

The UK Government continue to advise everybody to keep safe by regularly washing their hands for 20 seconds, using soap and water or hand sanitiser. It has and continues to be a foundation of hospitality safety care, it's simple and effective in combating Covid-19, but it's all too easy to forget.

The Governments advice underlines that hand washing is most important when you get to work or handle food. So, the portable hand wash timer can be tactically placed within all hospitality businesses to ensure hand washing is prioritised and not forgotten.

Our hand wash timer requires no user intervention to operate or activate – batteries ensure it is permanently activated for up to 3 years.

It is an easy-to-use and hands-free tool: 4 quadrants provide a simple visual, continuous, countdown of those vital 20 seconds that health and safety experts recommend as the minimum time needed for washing hands to prevent the spread of germs and infectious diseases.

A well-placed Touchless-20 Hand Wash Timer encourages safe cleaning habits for your employees and helps them meet HACCP safety requirements, as well as demonstrating your business' commitment to health & safety standards both to customers and health inspectors.

Adhere it directly to any flat steel surface – a mounting kit with a magnetic strip and adhesive included.

Keep hand wash timers in front of all staff to keep safety measures front of mind.
